AI AGENTS IN EVERYDAY COMMUNITY LIFE | Interaction & Prototyping

Design postgraduate combining AI-assisted web prototyping, game interaction design and public-facing activities. Interested in working directly with young and older adults to explore everyday uses of AI agents. Brings practical experience translating feedback into interaction changes, explaining visual information and coordinating participatory activities.

EDUCATION

The Hong Kong Polytechnic University | School of Design — Aug 2026 - Dec 2027 expected

- MSc in Innovative Multimedia Entertainment (MScIME).

Shenzhen University | Architecture & Urban Planning — Sep 2021 - Jun 2026

- Bachelor of Engineering in Landscape Architecture.

INTERACTION PROTOTYPES & DOCUMENTED ITERATION

ORBIT | Interaction designer, AI-assisted web prototype — Nov 2026

- Defined spatial card navigation, hover focus, grouping, favorites and undo; used Codex to assist HTML/CSS/JavaScript and Three.js implementation.
- Included browser-local persistence, reduced-motion support and a WebGL fallback to accommodate different viewing and device conditions.
- Used reported trial feedback to refine planet customization, search settings and ring dragging; documented design decisions and verification. Live demo | Source and iteration record.

Hong Kong Radiation Map | Public-data interaction prototype — Oct 2026

- Presented readings from 12 Hong Kong Observatory stations through a zoomable map, visual tiers, time filters and exact values on hover.
- Used generative AI to assist implementation; reviewed unclear data presentation and unintended map movement, and documented sources, missing values and limitations. Project and documentation.

COMMUNITY PARTICIPATION & COLLABORATION

Little Lychee Program, SZU Student Union | Volunteer Team Leader — Dec 2021

- Led nine teammates in organizing interactive activities for children; coordinated on-site roles and activity delivery.

Sunflower Media | Sales & Marketing Intern — Feb - Mar 2023

- Coordinated interactions between parade mascots and visitors and launched a stamp-collecting activity with an on-site post office.
- Adapted the booth experience through decoration and background music to encourage visitor participation.

Xiamen Dianchu Technology, Guangzhou | Game Design Intern — Sep - Nov 2025

- Researched comparable games, forums and player reviews; independently produced two proposals defining core loops, rules and system mechanics.
- Reviewed an incubation-stage 2D project and proposed changes to gameplay depth and feedback; communicated ideas through design documents and visual assets.

SKILLS & RESEARCH INTERESTS

Practical skills: Interaction flows, visual feedback, AI-assisted prototyping, feedback-driven iteration, documentation and team coordination.
Tools: Codex, ChatGPT, Figma, Photoshop, Illustrator, UE5, Blender and Maya.
Research interests: Everyday AI use across age groups; approachable agent interactions; small prototype experiments informed by community feedback.
Languages: Mandarin Chinese (native), English (intermediate), Cantonese (beginner).
